|---------------------------------|--|--------------------|
| Sept 14—now | FIS | Caen, France |
| Software engineer
APPRENTICE | As our products are part of the payment card industry, I am building a GUI to test transaction messages and enhance the test team productivity.
Technologies: Java, Swing, Eclipse, JIRA, ClearCase.
Reference: M ^r . Nedzad Mujdzic, nedzad.mujdzic@clear2pay.com | |
| June 14—now | proversity.org | London, UK |
| Full-stack developer
INTERN | Part of a fast-growing environment in Wayra accelerator. Working on MOOCs:
- built an analytics dashboard to prove a social diversity among our users,
- in charge for integrating our design on our edX platform front-end.
Technologies: Python, Django, MongoDB, Git, LESS, Google Charts, Bootstrap, Grunt.
Reference: M ^r . Carl Dawson, carl.dawson@proversity.org
Location: 4 months on-site and working remotely since. | |
| Sept 12—May 14 | Clear2Pay | Caen, France |
| DevOps engineer
APPRENTICE | Set up a complete Continuous Integration server and developed plugins for Jenkins:
- on a nightly basis, the server gets the source from our source control, builds our products and runs up to 30k unit tests,
- results are sent by email to the team whom I gave a training presentation.
Technologies: Java, Jenkins API, JUnit, Ant, ClearCase, Sonar.
